1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-7, drawn to a ceramic matrix, classified in class 501, subclass 127.
  - II. Claims 8-22, drawn to a method of preparing a matrix and a method of making a composite, classified in class 264, subclass 621.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions Group II and Group I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(I)). In the instant case the product as claimed can be made by another and materially different process such as one in which alumina particles are provided and they are then suspended in a medium in which a sol is then created.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
